

# Advanced Networking Hardware

When subscribing to a residential service plan the ONT is provided at no extra monthly cost.

The provided ONT (Optical Network Terminal) converts light traveling over the fiber optic cable to allow you internet access.

Please note FairlawnGig business customers have a different ONT, customized to match the specific requirements of each business.

## The FairlawnGig ONT

Manufactured by Azores Networks, the FairlawnGig ONT features:

Wi-Fi 6 capabilities, enabling faster Wi-Fi speeds.

Internal XGS optics, meaning the fiber connects directly to the ONT.

Six external antennas for better Wi-Fi range.

Firewall and other security features that allow you to manage your home network.

Two analog phone ports for optional phone service.

Azores also makes a bridge router capable of multi-gigabit speeds for "Pro" residential customers.

## Your New Home Network

FairlawnGig recommends utilizing all the home networking capabilities built into the ONT. To access these features please contact tech support for assistance.
